This guide will show how to install Viva TV APK on Firestick/Android and review features, settings, and much more. Viva TV is a free streaming app that provides thousands of free movies, TV shows, documentaries, and more. This app is a clone of TeaTV. It is considered one of the Best Movie APKs available today. Many pair Viva TV with IPTV services, as many live TV providers don't offer much VOD content. Along with Cinema HD or Cyberflix, this is one of the most popular apps used by those who jailbreak their Firesticks. Categories within this app include entertainment, comedy, fantasy, action, adventure, horror, documentaries, anime, and others. This streaming app can be installed on any Android-powered device including the Amazon Firestick, Fire TV, Fire TV Cube, NVIDIA Shield, and more. There are thousands of streaming apps and services and Viva TV is one of the best available. This is a popular alternative to traditional VOD packages. LEGAL DISCLAIMER: IPTV WIRE does not own or operate any IPTV service or streaming application. We do not host or distribute any applications. We do not verify whether IPTV services or app developers carry the proper licensing. The end-user shall be solely responsible for media accessed through any device, app, add-on, or service mentioned on our Website. For 100% legal IPTV service, IPTV WIRE recommends Vidgo. Is Viva TV APK Safe? Before installing this, I first want to scan the official Android APK installation file with VirusTotal. Here is the screenshot of the scan results. VirusTotal did not find any suspicious files pertaining to viruses/malware within the Viva TV APK file. However, we should always protect ourselves when streaming content from this 3rd party app. We strongly recommend using a VPN with these unverified streaming apps. Check out the link below for more information. Best VPN for Streaming Below you find information on this free streaming app including how to install, categories, settings, and more. The main categories within this app include Movies, TV Shows, Calendar, Discover, Collection, Settings, and more. Real-Debrid Integration One of the most popular features within Viva TV APK on Firestick is the ability to integrate Real-Debrid within the application. Real-Debrid is a premium service for less than \$5.00/month that populates higher quality streaming links for smoother playback. Follow the steps below for integrating Real-Debrid within Viva TV. 1. Click Setting on the main menu. 2. Click Login to Real-Debrid. 3. Note the code that appears on the screen. 4. Visit the following URL on any browser - real-debrid.com/device. Then enter the code from Step 3. 5. You will then receive an authorization complete notification. 6. Return back to the Settings within Viva TV and you should find you are now logged in with Real-Debrid. Continue below for integrating external video players. Use External Video Players Viva TV also allows for users to integrate external video players including MX Player, VLC, and others to improve playback. Follow the short guide below for using external video players in Viva TV. 1. First install any external video player such as MX Player or VLC Player. In this example, we used MX Player. MX Player - Google Play Store 2. Open Viva TV, then search for the content you want to play. For this example, we used Night of the Living Dead. Try Surfshark Risk-Free Now! 3. Click Watch Now. 4. Choose Play with external video player. That's it! You can now use MX Player on Viva TV. Subtitles Another great feature within Viva TV is the ability to use Subtitles when playing content. See the steps below for using subtitles within the app. 1. Choose a Movie or TV Show (in the public domain) and click your preferred streaming source. 2. Click Watch now. 3. Select Play with subtitles. 4. Click one of the listed subtitle options. 5. Your content will now start playing with subtitles! Warning! Protect Yourself With Surfshark VPN Most cord-cutters use a VPN and rightfully so. Some IPTV services and app developers have been tied to organized crime and you don't want your identifying IP Address in their hands. Without a VPN, your IP Address is being logged. Your IP Address points back to your location and identity which compromises both your privacy and security. Your current identifying IP Address is 2600:8807:6003:f00:2049:4f15:c20e:6a39 - When you use a VPN, your real IP address will be converted into an anonymous new one. A VPN will provide you with an anonymous connection to the Internet. This will prevent IPTV developers, Internet provider, government agencies, and any 3rd party from logging what you're accessing online. The most popular VPN among cord-cutters is Surfshark due to their blazing fast speeds and zero log policy. It's important to use a VPN that is fast since we are streaming large HD files. It's also crucial to find one that keeps no logs of what their subscribers access while online. Setting up Surfshark on your streaming device is simple! Step 1 Register for a Surfshark VPN account by clicking the link below. This exclusive link provides you with a hefty discount, only available to IPTV Wire visitors like you. Register for Surfshark Account & Save 82% Step 2 - Go to Find and then click the search icon on your Firestick, Fire TV, or Fire TV Cube. You may also find the Surfshark VPN App in the Google Play Store for those of you who are using Android TV Boxes, phones, and tablets. Step 3 - Type Surfshark and then click the Surfshark VPN option that appears. Step 4 - Click the Surfshark icon under Apps & Games. Step 5 - Click Download. Step 6 - Click Open. Step 7 - Click Log in. Step 8 - Enter your username and password to login. Your username is the email that you used to register for Surfshark service with and your password is automatically generated and emailed to you. Step 9 - Click the Fastest location option. Step 10 - Click OK for Connection request if it appears. Step 11 - You will notice that your IP Address changes along with location of connection. You are now operating anonymously through your device. Click the Home Button on your remote and the VPN will remain running in the background. Congratulations! You are now protected by Surfshark VPN which means everything that you stream or access through your Firestick or Android TV Box is hidden from the rest of the world. If you ever need to stop the VPN service, simply re-launch the application and click the DISCONNECT button. For more information on Viva TV APK, refer to the video below.
